Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-16 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure, which is not enabling. The specification fails to teach what the "agent capable of dissolving the polycrystalline silicon" is as well as the "counting method" and the particle counter(7) for quantifying the foreign particles. These elements are critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976).

Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are vague and indefinite as to what the "agent" is and how the foreign particles are counted/analyzed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kuramasu et al. teach a method of fabricating a thin film transistor.
